L4 - Clone GitHub repository using Visual Studio Code IDE

Step 1: Create a Git hub account with email-id and create Username.

Step 2: Create a repo (folder)

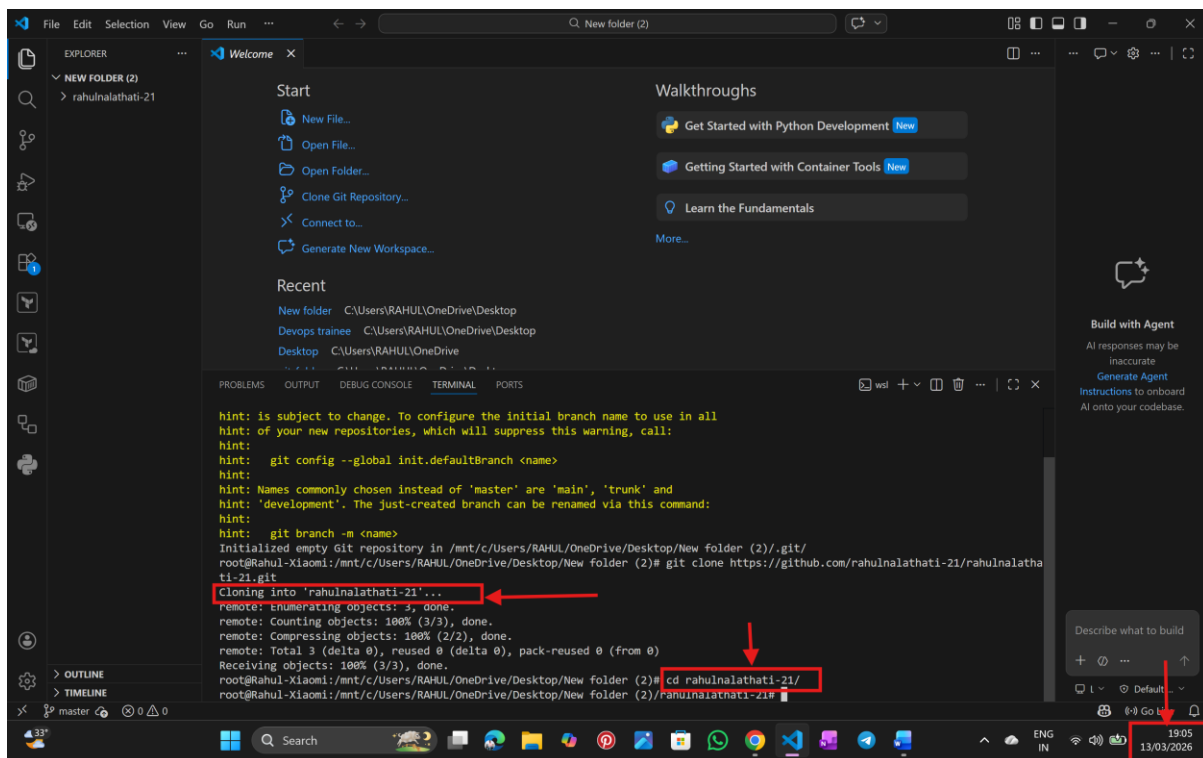

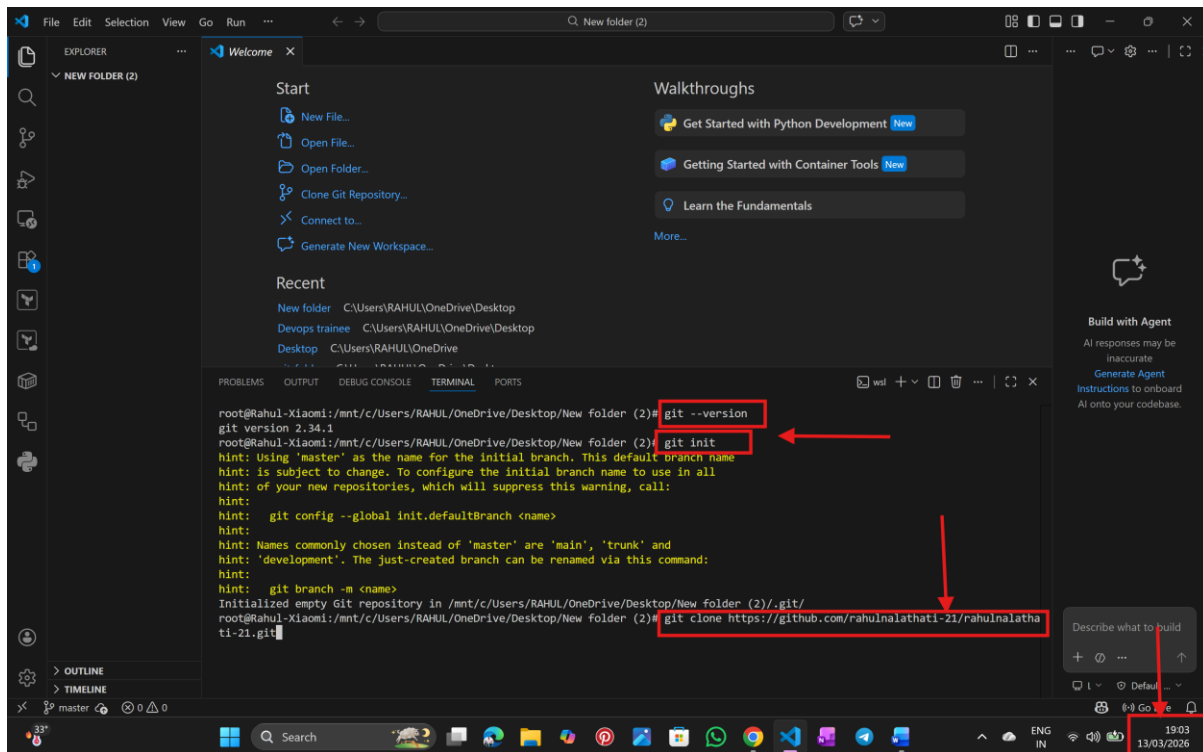

Step 3: Install visual studio code app (VSC) and it

Step 4: make sure git is installed if not install git

Step 5: copy the URL of the repo from git hub account

Step 6: In the VSC terminal use the git clone command to clone the repo into local.

Git clone <https://github.com/rahulnalathati-21/rahulnalathati-21>.git
